Due to extremely hot June temperatures and the scattered nature of rainfall during this time of the year, all Drought Regions are in the Drought Advisory status. As we head into the hotter months of summer, OWR will continue monitoring our water resources and update this Declaration as needed.

Water managers are urged to carefully monitor conditions and encourage the wise and efficient use of our water resources. Public water system customers are encouraged to follow their local water system’s recommendations regarding water use. All other water users should make prudent decisions on their water use to protect available resources.
